Expulsions lays bare the extent to which the sheer complexity of the global economy makes it hard to trace lines of responsibility for the displacements, evictions, and eradications it produces--and equally hard for those who benefit from the system to feel responsible for its depredations.

the UN Secretary-General and international relations specialist Jennifer Welsh delivers a timely, intelligent, and fascinating analysis of twenty-first-century geopolitics. In 1989, as the Berlin Wall crumbled and the Cold War dissipated, the American political commentator Francis Fukuyama wrote a famous essay, entitled “The End of History,” which argued that the demise of confrontation between Communism and capitalism, and the expansion of Western liberal democracy, signalled the endpoint of humanity’s sociocultural and political evolution, and the path toward a more peaceful world. But a quarter of a century after Fukuyama’s bold prediction, history has returned: arbitrary executions, attempts to annihilate ethnic and religious minorities, the starvation of besieged populations, invasion

and annexation of territory, and the mass movement of refugees and displaced persons. It has also witnessed cracks and cleavages within Western liberal democracies as a result of deepening economic inequality. The Return of History argues that our own liberal democratic society was not inevitable, but that we must all, as individual citizens, take a more active role in its preservation and growth.

Examines the formidable challenges facing the middle class, calling for fundamental changes while surveying the extent of the problem and identifying the people and agencies most responsible.

Farmer protests against land dispossession. Dispossession Without Development demonstrates that beneath these conflicts lay a profound shift in regimes of dispossession. While the postcolonial Indian state dispossessed land mostly for public-sector industry and infrastructure, since the 1990s state governments have become land brokers for private real estate capital. Using the case of a village in Rajasthan that was dispossessed for a private Special Economic Zone, the book ethnographically illustrates the exclusionary trajectory of capitalism driving dispossession in contemporary India. Taking us into the lives of diverse villagers in "Rajpura," the book meticulously documents the destruction of agricultural livelihoods, the marginalization of rural labor, the spatial unevenness of infrastructure provision, and the dramatic

Consequences of real estate speculation for social inequality and village politics. Illuminating the structural underpinnings of land struggles in contemporary India, this book will resonate in any place where "land grabs" have fueled conflict in recent years.

The proposal that the impact of humanity on the planet has left a distinct footprint, even on the scale of geological time, has recently gained much ground. Global climate change, shifting global cycles of the weather, widespread pollution, radioactive fallout, plastic accumulation, species invasions, the mass extinction of species - these are just some of the many indicators that we will leave a lasting record in rock, the scientific basis for recognizing new time intervals in Earth's

history. The Anthropocene, as the proposed new epoch has been named, is regularly in the news. Even with such robust evidence, the proposal to formally recognize our current time as the Anthropocene remains controversial both inside and outside the scholarly world, kindling intense debates. The reason is clear. The Anthropocene represents far more than just another interval of geologic time. Instead, the Anthropocene has emerged as a powerful new narrative, a concept through which age-old questions about the meaning of nature and even the nature of humanity are being revisited and radically revised. This Very Short Introduction explains the science behind the Anthropocene and the many proposals about when to mark its beginning: the nuclear tests of the 1950s? The beginnings of agriculture? The origins of

humans as a species? Erle Ellis considers the many ways that the Anthropocene's "evolving paradigm" is reshaping the sciences, stimulating the humanities, and foregrounding the politics of life on a planet transformed by humans. The Anthropocene remains a work in progress. Is this the story of an unprecedented planetary disaster? Or of newfound wisdom and redemption? Ellis offers an insightful discussion of our role in shaping the planet, and how this will influence our future on many fronts. Interesting and challenging topics highly readable.

“I have seen yesterday. I know tomorrow.” This inscription in Tutankhamun’s tomb summarizes *The Fifth Beginning*. Here, archaeologist Robert L. Kelly explains how the study of our cultural past can predict the future of humanity. In an eminently readable style, Kelly identifies four key pivot points in the six-million-year history of human development: the emergence of technology, culture, agriculture, and the state. In each example, the author examines the long-term processes that resulted in a definitive, no-turning-back change for the organization of society. Kelly then looks ahead, giving us evidence for what he calls a fifth beginning, one that started about AD 1500. Some might call it

“globalization,” but the author places it in its larger context: a five-thousand-year arms race, capitalism’s global reach, and the cultural effects of a worldwide communication network. Kelly predicts that the emergent phenomena of this fifth beginning will include the end of war as a viable way to resolve disputes, the end of capitalism as we know it, the widespread shift toward world citizenship, and the rise of forms of cooperation that will end the near-sacred status of nation-states. It’s the end of life as we have known it. However, the author is cautiously optimistic: he dwells not on the coming chaos, but on humanity’s great potential.

Undergraduate level and upward. Using their thematic and regional expertise, the authors cover events in Europe, Asia, the Middle East, Africa and the Americas from the last century and beyond. Among the areas this book covers are: the decline of European hegemony over the international order; the diffusion of power to the two superpowers; the rise of newly independent states in Asia and Africa; and, the course and consequences of the major global conflicts of the twentieth century. This second edition is thoroughly updated, and includes extended coverage of European integration, the rise of supra-governmental organizations, and the 'global War on Terror'.

Origins of Globalization draws widely on ancient sources and modern economic theory to detail the concept of “known world” globalization, arguing that a mixed economy--similar in many respects to our own--existed in a variety of forms throughout the ancient world. By analyzing the business practices of the ancient world--phenomena such as resource and market seeking behavior, international trade from China, India and Rome, to Africa and even northern and western parts of Europe, Small and Medium Size Enterprises (SMEs) operating internationally and outsourcing production, multicultural workforces, tariff reduced zones, interregional tax issues, and the management of currency risks--the authors provide readers with a unique historical interpretation

of the contemporary globalizing economy and a durable theoretical framework for future historical economic analyses.

Since humans migrated from Africa and dispersed throughout the world, they have found countless ways and reasons to reconnect with each other. In this entertaining book, Nayan Chanda follows the exploits of traders, preachers, adventurers, and warriors throughout history as they have shaped and reshaped the world. For Chanda, globalization is a process of ever-growing interconnectedness and interdependence that began thousands of years ago and continues to this day with increasing speed and ease. In the end, globalization—from the lone adventurer carving out a new trade route to the expanding ambitions of great empires—is

the product of myriad aspirations and apprehensions that define just about every aspect of our lives: what we eat, wear, ride, or possess is the product of thousands of years of human endeavor and suffering across the globe. Chanda reviews and illustrates the economic and technological forces at play in globalization today and concludes with a thought-provoking discussion of how we can and should embrace an inevitably global world.
