2003 Ford Escape Engine Misfiring: 5 Complaints

A relatively common, yet difficult to diagnose OBD-II trouble code is P0316. It has the same meaning for the Ford Escape as it would any other vehicle. It indicates that there is a misfire at the startup of the vehicle, and that it happens within the first 1000 revolutions of the engine. P0316: Engine Misfire → At Startup

Ford Escape P0316: Engine Misfire → At Startup ...

P0303: Misfire Detected → Cylinder 3 P0303 should not be ignored, and can be a threat to the drivability the Ford Escape. The nice thing about P0303 is that it's a cylinder specific trouble code, which makes diagnosing the problems simpler than P0300, which means that the cylinders are randomly misfiring.

Ford Escape P0303: Cylinder 3 - Misfire Detected ...

2003 escape misfire. have a 2003 ford escape with code p0351 and p0301 change plugs and coil packs on cylinder 1,2,3 just change pcm with a used one from a used part supplier not a junk yard.had the pcm reprogramed still have the same promblem of skipping .also had to reprogram the pcm with the key i always used and then they took one out of the security system that was not cut out made me a new key check engine light came on when i used that key car ran but engine light came on with code ...
