Mazda to slot famed rotary engine in plug-in MX-30

The company is confident its 3.3-liter diesel will meet Euro 7 regulations. Going against the tide, Mazda is introducing a new family of large combustion engines featuring an inline-six layout. Coming ...

These meditations inspired by a Matisse painting are a paean to the act of seeing, celebrating our capacity to be transformed by the truths art holds. The New York Times Book Review Named a Chicago Tribune Best Book of the Year and a Los Angeles Times Favorite Nonfiction of the Year Just out of college, Patricia Hampl was mesmerized by a Matisse painting in the Art Institute of Chicago: an aloof woman gazing at goldfish in a bowl, a Moroccan screen behind

her. In *Blue Arabesque*, Hampel explores the allure of this lounging woman, immersed in leisure, so at odds with the rush of the modern era. Hampel's meditation takes us to the Cote d'Azur and to North Africa, from cloister to harem, pondering figures as diverse as Eugene Delacroix, F. Scott Fitzgerald, and Katherine Mansfield. Returning always to Matisse's portraits of languid women, she discovers they were not decorative indulgences but something much more. Moving with the life force that Matisse sought in his work, *Blue Arabesque* is Hampel's dazzling and critically acclaimed tour de force.

The best-selling automotive technology book for students and professionals. Revised and updated throughout to match C&G and IMI awards (4000 series) this book is the most comprehensive text for the FE market. It covers the needs of C&G 4001 and all of the underpinning knowledge required for motor vehicle engineering NVQs up to level 3. Copiously illustrated with over 1000 images, it is certain to remain a highly popular and valuable text for both students and practicing engineers. \* Incomparable breadth and depth of coverage, over 1000 illustrations and Institute of the Motor Industry recommended: this is the core book for students of automotive engineering \* Fully up to date with latest IMI and C&G 4000 series course requirements and provides all the underpinning knowledge required for NVQs to level 3 \* New material covering latest development in electronics, alternative fuels, emissions and diesel systems

*Motion Picture and Video Lighting, Second Edition*, is your indispensable guide to film and video lighting. Written by the author of the industry bible *Cinematography*, this book explores technical, aesthetic, and practical aspects of lighting for film and video. It will show you not only how to light, but why. Written by a professional in the field, this comprehensive book explores light and color theory; equipment; and techniques to make every scene look its best. Now in full color, *Motion Picture and Video Lighting* is heavily illustrated with photos and diagrams throughout. This new edition also includes the ultimate 'behind the scenes' DVD that takes you directly on a professional shoot and demonstrates technical procedures and equipment. In addition, 20 video clips include: lighting demonstrations, technical tests, fundamentals of lighting demos, and short scenes illustrating different styles of lighting.

With the changing landscape of the transport sector, there are also alternative powertrain systems on offer that can run independently of or in conjunction with the internal combustion (IC) engine. This shift has actually helped the industry gain traction with the IC Engine market projected to grow at 4.67% CAGR during the forecast period 2019-2025. It continues to meet both requirements and challenges through continual technology advancement and innovation from the latest research. With this in mind, the contributions in *Internal Combustion Engines and Powertrain Systems for Future Transport 2019* not only cover the particular issues for the IC engine market but also reflect the impact of alternative powertrains on the propulsion industry. The main topics include: □ Engines for hybrid powertrains and electrification □ IC engines □ Fuel cells □ E-machines □ Air-path and other technologies achieving performance and fuel economy benefits □ Advances and improvements in combustion and ignition systems □ Emissions regulation and their control by engine and after-treatment □ Developments in real-world driving cycles □ Advanced boosting systems □ Connected powertrains (AI) □ Electrification opportunities □ Energy conversion and recovery systems □ Modified or novel engine cycles □ IC engines for heavy duty and off highway *Internal Combustion Engines and Powertrain Systems for Future Transport 2019* provides a forum for IC engine, fuels and powertrain experts, and looks closely at developments in powertrain technology required to meet the demands of the low carbon economy and global competition in all sectors of the transportation, off-highway and stationary power industries.

Following three teenagers who chose to spend one school year living in Finland, South Korea, and Poland, a literary journalist recounts how attitudes, parenting, and rigorous teaching have revolutionized these countries' education results.

An essential reference for all game designers, this 1938 classic is "a fascinating account of "man the player" and the contribution of play to civilization" (Harper's) In this classic evaluation of play that has become a "must-read" for those in game design, Dutch philosopher Johan Huizinga defines play as the central activity in flourishing societies. Like civilization, play requires structure and participants willing to create within limits. Starting with Plato, Huizinga traces the contribution of Homo Ludens, or "man the player" through Medieval Times, the Renaissance, and into our modern civilization. Huizinga defines play against a rich theoretical background, using cross-cultural examples from the humanities, business, and politics. Homo Ludens defines play for generations to come.

This fundamental work explains in detail systems for active safety and driver assistance, considering both their structure and their function. These include the well-known standard systems such as Anti-lock braking system (ABS), Electronic Stability Control (ESC) or Adaptive Cruise Control (ACC). But it includes also new systems for protecting collisions protection, for changing the lane, or for convenient parking. The book aims at giving a complete picture focusing on the entire system. First, it describes the components which are necessary for assistance systems, such as sensors, actuators, mechatronic subsystems, and control elements. Then, it explains key features for the user-friendly design of human-machine interfaces between driver and assistance system. Finally, important characteristic features of driver assistance systems for particular vehicles are presented: Systems for commercial vehicles and motorcycles.

For anyone who is trying to keep up with the extremely rapid developments in the biodiesel industry, the second edition of Biodiesel: Growing a New Energy Economy is an invaluable aid. The breathtaking speed with which biodiesel has gained acceptance in the marketplace in the past few years has been exceeded only by the proliferation of biodiesel production facilities around the United States--and the world--only to confront new social and environmental challenges and criticisms. The international survey of the biodiesel industry has been expanded from 40 to more than 80 countries, reflecting the spectacular growth of the industry around the world. This section also tracks the dramatic shifts in the fortunes of the industry that have taken place in some of these nations. The detailed chapters that cover the industry in the United States have also been substantially rewritten to keep abreast of its many new developments and explosive domestic growth. An expanded section on small-scale, local biodiesel production has been added to better represent this small but growing part of the industry. Another new section has been added to more fully explore the increasingly controversial issues of deforestation and food versus fuel, as well as GMO crops. The second edition concludes with updated views on where the industry is headed in the years to come from some of its key players.
