Annually \$ 119.00. Description. The High Output, Twin Cooled 103 has a complete cooling system that must be inspected as part of regular, preventive maintenance. This system is very similar to an automotive cooling system.It consists of two radiators, located in the motorcycle's right and left side lower fairings.

Harley-Davidson Liquid Cooled Service! Fix My Hog

Cooling the cylinder heads with liquid has no effect on service interval: Harleys with equivalent Twin-Cooled and standard engines require service after the first 1,000 miles, and 5,000 miles thereafter. Incidentally, the new engines use the same coolant blend as the V-Rod, a 50/50 premix that uses long life coolant.

Liquid Cooled 2014 Harley-Davidsons: 6 Things to Know

Talking to a fellow HD rider on saturday. Matter of fact, his ride is an 2010 CVO ultra which had just turned 100,000 miles. He must live on the thing. Anyway, he mentioned a friend of his who had bought one of the 2014 models with the water cooling and said the bike "popped the cap" of the left...

Water cooled bike problem? | V-Twin Forum

Well, new to Harley at least. With extreme ease of access and the simplicity of the procedure, Harley has made it an easy transition to liquid cooling its power plant. Not only is it a snap to check/add coolant to these bikes, Harley has done an excellent job of hiding the fact that there is a cooling system on the bike.

Keeping Your Liquid-Cooled Harley... Cool! | Baggers

2015 Harley Water Cooled Engine Introduced last year on the Ultra Limited, CVO Limited and Tri-Glide Ultra trike, the Twin-Cooled engine uses liquid-cooling for the cylinder heads, reducing emissions. Based on the certification documents, the Twin-Cooled engine will Page 5/29.

The oil cooler features a controlled fan that provides a continuous flow of cooling air, thus helping your engines cool down and reduce the wearing of the plastic shoes.

2015 Harley Water Cooled Engine - h2opalermo.it

The biggest improvements people wanted to see was in the power, heat and vibration. Harley was able to increase the power while also keeping the range and consumption similar and in some cases making it even better. To deal with the heat issue, Harley reduced the exhaust gas temperature by 100°F (55.6 C), allowing for a more comfortable ride. They were able to make this possible by relocating the hot catalytic converters further from the cockpit, as well as introducing a better water ...

Harley-Davidson Milwaukee-Eight engine - Wikipedia

The V-Rod Revolution engine was introduced in 2002 as a beefy metric V-twin with the VR1000's 60-degree, water-cooled, short-stroke architecture. (Harley Evolution engines are air-cooled, 45 ...
