Many of these formulas are used when analyzing single properties and multi-family properties. Presented below are the more popular real estate

Commonly Used Real Estate Calculations and Formulas ...

70% Rule Calculator. The 70% rule is a basic quick calculation to determine what the maximum price you should offer on a property should be. This calculation is made by times-ing the after repaired value ("ARV") by 70% and then subtracting any repairs needed. This gives you a 30% margin to cover your profit, holding costs & closing costs. Many experienced investors tighten this number up to being 75%.
