Autobiography of a former vice admiral of Indian Navy.

Admiral Stavridis, a leader in military, international affairs, and national security circles, shares his love of the sea and some of the sources of that affection. The Sailor's Bookshelf offers synopses of fifty books that illustrate the history, importance, lore, and lifestyle of the oceans and of those who

"go down to the sea in ships." Stavridis colors those descriptions with glimpses of his own service—"sea stories" in popular parlance—that not only clarify his choices but show why he is held in such high esteem among his fellow sailors. Divided into four main categories—The Oceans, Explorers, Sailors in Fiction, and Sailors in Non-Fiction—Admiral Stavridis' choices will appeal to "old salts" and to those who have never known the sights of the ever-changing seascape nor breathed the tonic of an ocean breeze. The result is a navigational aid that guides readers through the realm of sea literature, covering a spectrum of topics that range from science to aesthetics, from history to modernity, from solo sailing to great battles. Among these eclectic choices are guides to shiphandling and navigation, classic fiction that pits man against the sea, ecological and strategic challenges, celebrations of great achievements and the lessons that come with failure, economic competition and its stepbrother combat, explorations of the deep, and poetry that beats with the pulse of the wave. Some of the included titles are familiar to many, while others, are likely less well-known but are welcome additions to this encompassing collection. Admiral Stavridis has chosen some books that are relatively recent, and he recommends other works which have been around much longer and deserve recognition.

From one of the most distinguished admirals of our time and a former Supreme Allied Commander of NATO, a meditation on leadership and character refracted through the lives of ten of the most illustrious naval commanders in history In *Sailing True North*, Admiral Stavridis offers lessons of leadership and character from the lives and careers of history's most significant naval commanders. He also brings a lifetime of reflection to bear on the subjects of his study—naval history, the vocation of the admiral, and global geopolitics. Above all, this is a book that will help you navigate your own life's voyage: the voyage of leadership of course, but more important, the voyage of character. *Sailing True North* helps us find the right course to chart. Simply as epic lives, the tales of these ten admirals offer up a collection of the greatest imaginable sea stories. Moreover, spanning 2,500 years from ancient Greece to the twenty-first century, *Sailing True North* is a book that offers a history of the world through the prism of our greatest naval leaders. None of the admirals in this volume were perfect, and some were deeply flawed. But from Themistocles, Drake, and Nelson to Nimitz, Rickover, and Hopper, important themes emerge, not least that serving your reputation is a poor substitute for serving your character; and that taking time to read and reflect is not a luxury, it's a necessity. By putting us on personal terms with historic leaders in the maritime sphere he knows so well, James Stavridis gives us a compass that can help us navigate the story of our own lives, wherever that voyage takes us.

"This will be a fight against overwhelming odds from which survival cannot be expected. We will do what damage we can." With these words, Lieutenant Commander Robert W. Copeland addressed the crew of the destroyer escort USS Samuel B. Roberts on the morning of October 25, 1944, off the Philippine Island of Samar. On the horizon loomed the mightiest ships of the Japanese navy, a massive fleet that represented the last hope of a staggering empire. All that stood between it and Douglas MacArthur's vulnerable invasion force were the Roberts and the other small ships of a tiny American flotilla poised to charge into history. In the tradition of the #1 New York Times bestseller *Flags of Our Fathers*, James D. Hornfischer paints an unprecedented portrait of the Battle of Samar, a naval engagement unlike any other in U.S. history—and captures with unforgettable intensity the men, the strategies, and the sacrifices that turned certain defeat into a legendary victory. BONUS: This edition includes an excerpt from James D. Hornfischer's *Neptune's Inferno*. Praise for *The Last Stand of the Tin Can Sailors* "One of the finest WWII naval action narratives in recent years, this book follows in the footsteps of *Flags of Our Fathers*. . . . Exalting American sailors and pilots as they richly deserve. . . . Reads like a very good action novel."—Publishers Weekly "Reads as fresh as tomorrow's headlines. . . . Hornfischer's captivating narrative uses previously classified documents to reconstruct the epic battle and eyewitness accounts to bring the officers and sailors to life."—Texas Monthly "Hornfischer is a powerful stylist whose explanations are clear as well as memorable. . . . A dire survival-at-sea saga."—Denver Post "In *The Last Stand of the Tin Can Sailors*, James Hornfischer drops you right into the middle of this raging battle, with 5-inch guns blazing, torpedoes detonating and Navy fliers dive-bombing. . . . The overall story of the battle is one of American guts, glory and heroic sacrifice."—Omaha World Herald

A Navy pioneer, Vice Adm. Samuel Gravely was the first African American to be commissioned a flag officer in the U.S. Navy, the first to command a Navy ship in the 20th century and the first to command a U.S. numbered fleet. This memoir is co-authored by noted naval historian Paul Stillwell. Read about Gravely's boyhood in Richmond, Virginia, through his officer service on a WWII sub chaser, to later tours of duty at sea and ashore.

Navy Admiral's Bronze Rules uses case studies to explore the inherent risks of leadership and the tools available to those who nevertheless wish to take those chances. Real world examples are used and inevitably expose hitherto unrevealed history. The latter includes a secret of the Yom Kippur War, the background of the 1986 bloodless revolution in the Philippines, how Admiral Bud Zumwalt was such a unique Chief of Naval Operations, why our National War Plan suddenly had to be revised during the Reagan years and what spurred President Clinton's anti-nuclear proliferation success.

Vigorous and highly readable, this portrait of the enlisted man's life aboard the U.S. battleship *California* depicts the devastation at Pearl Harbor from the hazardous vantage point of the open "birdbath" atop the mainmast.

This account of a disaster at sea during World War II is "a powerful and engrossing story of tragedy,

survival, and heroism" (Mark Bowden, author of *Black Hawk Down*). In the final days of 1944, Admiral William "Bull" Halsey is the Pacific theater's most popular and colorful naval hero. After a string of victories, the "Fighting Admiral" and his thirty-thousand-man Third Fleet are charged with protecting General MacArthur's flank during the invasion of the Philippine island of Mindoro. But in the midst of the landings, Halsey attempts a complicated refueling maneuver—and unwittingly drives his 170 ships into the teeth of a massive typhoon. Halsey's men find themselves battling ninety-foot waves and 150 mph winds. Amid the chaos, three ships are sunk and nearly nine hundred sailors and officers are swept into the Philippine Sea. For three days, small bands of survivors battle dehydration, exhaustion, sharks, and the elements, awaiting rescue. It will be up to courageous lieutenant commander Henry Lee Plage to defy orders and sail his tiny destroyer escort, the USS *Tabberer*, back into the storm to rescue drifting sailors. Revealing a little-known chapter of WWII history in absorbing detail, this is "a vivid tale of tragedy and gallantry at sea." (Publishers Weekly).
