The American Standard 92 is an affordable option that can still reliably heat your home. The furnace operates at 92.1 percent AFUE, making it an energy-efficient model. This gas furnace is not only affordable upfront, but it helps you save on energy usage, lowering your bill and reducing greenhouse gas emissions.

Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.
