A lovely small-trim edition of the award-winning Atlas of Remote Islands The Atlas of Remote Islands, Judith Schalansky's beautiful and deeply personal account of the islands that have held a place in her heart throughout her lifelong love of cartography, has captured the imaginations of readers everywhere. Using historic events and scientific reports as a springboard, she creates a story around each island: fantastical, inscrutable stories, mixtures of fact and imagination that produce worlds for the reader to explore. Gorgeously illustrated and with new, vibrant colors for the Pocket edition, the atlas shows all

fifty islands on the same scale, in order of the oceans they are found. Schalansky lures us to fifty remote destinations—from Tristan da Cunha to Clipperton Atoll, from Christmas Island to Easter Island—and proves that the most adventurous journeys still take place in the mind, with one finger pointing at a map.

Judith Schalansky was born in 1980 on the wrong side of the Berlin Wall. The Soviets wouldn't let anyone travel so everything she learnt about the world came from her parents' battered old atlas. An acclaimed novelist and award-winning graphic designer, she has spent years creating this, her own imaginative atlas of the world's loneliest places. These islands are so difficult to reach that until the late 1990s more people had set foot on the moon than on Peter I Island in the Antarctic. On one page are perfect maps, on the other unfold bizarre stories from the history of the islands themselves. Rare animals and strange people abound: from marooned slaves to lonely scientists, lost explorers to confused lighthouse keepers, mutinous sailors to forgotten castaways; a collection of Robinson Crusoes of all kinds. Recently awarded the prize of Germany's most beautiful book, the Atlas of Remote Islands is an intricately designed masterpiece that will delight maplovers everywhere. Judith Schalansky lures us across all the oceans of the world to fifty remote islands - from St Kilda to Easter Island and from Tristan da Cunha to Disappointment Island - and proves that some of the most memorable journeys can be taken by armchair travellers.

A dazzling book about memory and extinction from the author of Atlas of Remote Islands Each disparate object described in this book—a Caspar David Friedrich painting, a species of tiger, a villa in Rome, a Greek love poem, an island in the Pacific—shares a common fate: it no longer exists, except as the dead end of a paper trail. Recalling the works of W. G. Sebald, Bruce Chatwin, or Rebecca Solnit, An Inventory of Losses is a beautiful evocation of twelve specific treasures that have been lost to the world forever, and, taken as a whole, opens mesmerizing new vistas of how we can think about extinction and loss. With meticulous research and a vivid awareness of why we should care about these losses, Judith Schalansky, the acclaimed author of Atlas of Remote Islands, lets these objects speak for themselves: she ventriloquizes the tone of other sources, burrows into the language of contemporaneous accounts, and deeply interrogates the very notion of memory.

Atlas of Improbable Places shows the modern world from surprising new vantage points that will inspire urban explorers and armchair travellers alike to consider a new way of understanding the world we live in.

Adaptation is everything. Inge Lohmark is well aware of that; after all, she's been teaching biology for more than thirty years. But nothing will change the fact that her school is going to be closed in four years: in this dwindling town in the eastern German countryside, there are fewer and fewer children. Inge's husband, who was a cattle inseminator before the reunification, is now breeding ostriches. Their daughter, Claudia, emigrated to the U.S. years ago and has no intention of having children. Everyone is resisting the course of nature the Inge teaches every day in class. When Inge finds herself experiencing intense feelings for a 9th-grade girl, her biologically determined worldview is shaken. And in increasingly outlandish ways, she tries to save what can no longer be saved.

What is it about islands that is so alluring, and why do so many people find these self-contained worlds irresistible? Utopia and Atlantis were islands, and islands have captured the imaginations of writers and artists for centuries. In 1719, Daniel Defoe published his tale of a castaway on a desert island, *Robinson Crusoe*, one of the first great novels in the history of English literature and an instant bestseller. Defoe's tale combined the real and the imagined into a compelling creative landscape, establishing a whole literary genre and unleashing the power of islands in storytelling. To celebrate the tercentenary of the publication of *Robinson Crusoe*, Archipelago presents a truly international range of leading illustrators who imagine they too have washed up on their own remote island. In specially created maps, they visualize what their island looks like, what it's called, and what can be found on its mythical shores. In a panoply of astonishingly creative responses, we are invited to explore a curious and fabulous archipelago of islands of invention that will beguile illustrators, cartographers, and dreamers alike.

Accompanying CD-ROM contains ... "150 of these [blackletter] fonts for free private and restricted commercial use."--Page 4 of cover.

What makes a place? Rebecca Solnit reinvents the traditional atlas, searching for layers of meaning & connections of experience across San Francisco.

International bestseller! James Bond has nothing on Dusko Popov. a double agent for the Abwehr, MI5 and MI6, and the FBI during World War II, Popov seduced numerous women, spoke five languages, and was a crack shot, all while maintaining his cover as a Yugoslavian diplomat... On a cool August evening in 1941, a Serbian playboy created a stir at Casino Estoril in Portugal by throwing down an outrageously large baccarat bet to humiliate his opponent. The Serbian was a British double agent, and the money—which he had just stolen from the Germans—belonged to the British. From the sideline, watching with intent

interest was none other than Ian Fleming... The Serbian was Dusko Popov. As a youngster, he was expelled from his London prep school. Years later he would be arrested and banished from Germany for making derogatory statements about the Third Reich. When World War II ensued, the playboy became a spy, eventually serving three dangerous masters: the Abwehr, MI5 and MI6, and the FBI. On August 10, 1941, the Germans sent Popov to the United States to construct a spy network and gather information on Pearl Harbor. The FBI ignored his German questionnaire, but J. Edgar Hoover succeeded in blowing his cover. While MI5 desperately needed Popov to deceive the Abwehr about the D-Day invasion, they assured him that a return to the German Secret Service Headquarters in Lisbon would result in torture and execution. He went anyway... Into the Lion's Mouth is a globe-trotting account of a man's entanglement with espionage, murder, assassins, and lovers—including enemy spies and a Hollywood starlet. It is a story of subterfuge and seduction, patriotism, and cold-blooded courage. It is the story of Dusko Popov—the inspiration for James Bond. INCLUDES PHOTOGRAPHS

Like humans, cities are mortal. They are born, they thrive, and they eventually die. In Atlas of Lost Cities, Aude de Tocqueville tells the compelling narrative of the rise and fall of such notable places as Pompeii, Teotihuacán, and Angkor. She also details the less well known places, including Centralia, an abandoned Pennsylvania town consumed by unquenchable underground fire; Nova Citas de Kilamba in Angola, where housing, schools, and stores were built for 500,000 people who never came; and Epecuen, a tourist town in Argentina that was swallowed up by water. Beautiful, original artwork shows the location of the lost cities and depicts how they looked when they thrived.
