LEGAL STUDIES CAPSTONE: ASSESSING YOUR

UNDERGRADUATE EDUCATION provides an opportunity for students to review, enhance and demonstrate their knowledge and practical application of the law. Achievement of learning objectives is shown through development of a portfolio of student work and a successful score on a comprehensive exam. Measurable learning objectives are detailed for each unit, with discussion questions, portfolio assignments and exam questions designed to measure the attainment of each outcome. Job search, continuing education, ethical obligations and technology skills are addressed, and students organize related documentation to prepare for post-graduation endeavors. These units are followed by summaries of core substantive and procedural areas of law, providing students with a review of prior studies as well as a gap-filler for keys areas essential to success in the workplace, continuing education, or certification and employment exams. Students can evaluate their knowledge of the law through review of questions and answers provided in the comprehensive exam in Appendix A. Portfolio assignments display their ability to draft pleadings, prepare contracts, complete forms and report research results for review by a prospective employer or as reference for future assignments. The Glossary and Other Resources listed in Appendix B assist in fostering successful outcomes in both portfolio development

Contract Law: A Case & Problem-Based Approach is a unique casebook that provides an organizational structure introducing students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law but also meant to help them appreciate the connections and relationships between and among these various subject areas. Part I, the “ 30,000-foot view, ” familiarizes students with contract law, discusses the sorts of problems with which contract law is concerned, and introduces them to some of the basic rules and theories governing contract law. Part II, the “ 10,000-foot view, ” exposes students to each major substantive area of contract law in more depth by discussing one classic case in each area, along with additional historical, theoretical, and contextual materials to supplement the black-letter doctrine. After finishing Parts I and II, the student will have a basic understanding of each major area of contract law, along with a good understanding of how these parts fit together. Part III is therefore designed to explore each of the major subject areas in greater depth, and is organized along the lines of a traditional contracts casebook, including a healthy mix of classic and modern cases, short problems, and exercises. New to the Second Edition: Additional materials and cases added to explore the contract doctrines of impossibility and impracticability in light of past and current epidemics (in the case of

polio) and pandemics (in the case of COVID-19). Additional case added to explore the relationship between Contract Law, Civil Rights, and Constitutional Law. Reorganization of some materials in Chapter 8 (defenses). More focused notes and appendices Professors and student will benefit from: Organization exposes students to main concepts, and gives professors a number of choices about how to teach their course. Helpful doctrinal introductions to each new major substantive section. Historical, theoretical, and comparative materials are presented to help students understand and think critically about the black-letter rules. “ Thinking tools ” feature that helps the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes enrich the students ’ black-letter experience. Enjoyable, contextual materials that are included after a number of classic cases help to bring to light fascinating background information.

With the demand to maintain a competitive advantage, the assessment and evaluation of education is vital in measuring the knowledge and skills of the students, community, and educational system as a whole by providing educators with the facts needed to enhance and improve the learning process. Cases on Assessment and Evaluation in Education presents a collection of case studies describing the methods used to assess an education course, what factors to assess, as well as which factors determine the success of these factors. This casebook aims to bring together different research perspectives on the questions surrounding the issues of educational assessment and evaluation.

This new text provides the most current coverage of measurement and psychometrics in a single volume. Authors W. Holmes Finch and Brian F. French first review the basics of psychometrics and measurement, before moving on to more complex topics such as equating and scaling, item response theory, standard setting, and computer adaptive testing. Also included are discussions of cutting-edge topics utilized by practitioners in the field, such as automated test

development, game-based assessment, and automated test scoring. This book is ideal for use as a primary text for graduate-level psychometrics/measurement courses, as well as for researchers in need of a broad resource for understanding test theory. Features: "How it Works" and "Psychometrics in the Real World" boxes break down important concepts through worked examples, and show how theory can be applied to practice. End-of-chapter exercises allow students to test their comprehension of the material, while suggested readings and website links provide resources for further investigation. A collection of free online resources include the full output from R, SPSS, and Excel for each of the analyses conducted in the book, as well as additional exercises, sample homework assignments, answer keys, and PowerPoint lecture slides.

This is the Mentor's Guide for TUMI's Capstone Module 3 English course, Theology of the Church, which is one of 16 modules in the Capstone Curriculum. This book is intended to be purchased by TUMI satellites, mentors, or site coordinators for use within a TUMI Satellite. The Quizzes, Final Exam, and Answer Keys for this module can be found on the TUMI Satellite Gateway (this is available to all approved TUMI satellites). The Urban Ministry Institute (TUMI) is a ministry of World Impact, Inc. TUMI Satellites are a part of the TUMI Network, where leaders are developed in the local church using TUMI's curriculum and training system. The Church of God in Jesus Christ is one of the most refreshing and important themes of all the Scriptures. Jesus of Nazareth, through his death, burial, and resurrection, has been exalted as head over his new people, those called to represent him in the earth and bear witness of his already/not yet Kingdom. To understand the Church's role in God's kingdom program is critical to every facet of personal and corporate discipleship: there is no discipleship or salvation apart from God's saving action in the Church. Grasping what God is doing in and through his people empowers God's leader to represent him with wisdom and honor. The Church is foreshadowed in God's exalted purpose to bring glory to himself by saving a new humanity through his covenant with Abraham. Through its worship, witness, and good works, the Church through the ages displays the unity, holiness, universality, and apostolicity of its communion. In the Church, God displays his kingdom life and shares his offer of grace to the world.

Enrich your students and the institution with a high-impact practice Designing and Teaching Undergraduate Capstone Courses is a practical, research-backed guide to creating a course that is valuable for both the student and the school. The book covers the design, administration, and teaching of capstone courses throughout the undergraduate curriculum, guiding departments seeking to add a capstone course, and allowing those who have one to compare it to others in the discipline. The ideas presented in the book are supported by regional and national surveys that help the reader understand what's common, what's exceptional, what works, and what doesn't within capstone courses. The authors also provide additional information specific to different departments across the curriculum, including STEM, social sciences, humanities, fine arts, education, and professional programs. Identified as a high-impact practice by the National Survey of Student Engagement (NSSE) and the Association of American Colleges and Universities' LEAP initiative, capstone courses culminate a student's final college years in a project that integrates and applies what they've learned. The project takes the form of a research paper, a performance, a portfolio, or an exhibit, and is intended to showcase the student's very best work as a graduating senior. This book is a guide to creating for your school or department a
