Acgih Industrial Ventilation Manual Chapter 10

In this chapter, the major factors affecting air and contaminant movement inside ventilated space are summarized and classified as:

(1) transport mechanism of contaminant in ventilated space; (2) contaminant sources; (3) forced convection or supply air jets introduced into the room by mechanical or natural ventilation systems, or their combination; (4) free convection flows along heated and cooled vertical surfaces and above heat sources; (5) airflow created in the vicinity of local and ...
