Details100 Years of Valor - The Story of FDNY Rescue Company 1 (1915-2015) Author - Paul Hashagen, FDNY Rescue 1 (retired) They were a company of men, proven firefighters hand picked from hundreds of volunteers. These men had past experience in the trades: iron workers, elevator men, and masons. They would use this knowledge and their new equipment to venture where no one else could.

Contemporary discussion surrounding the role of the internet in society is dominated by words like: internet freedom, surveillance, cybersecurity, Edward Snowden and, most prolifically, cyber war. Behind the rhetoric of cyber war is an on-going state-centered battle for control of information resources. Shawn Powers and Michael Jablonski conceptualize this real cyber war as the utilization of digital networks for geopolitical purposes, including covert attacks against another state's electronic systems, but also, and more importantly, the variety of ways the internet is used to further a state's economic and military agendas. Moving beyond debates on the democratic value of new and emerging information technologies, The Real Cyber War focuses on political, economic, and geopolitical factors driving internet freedom policies, in particular the U.S.

State Department's emerging doctrine in support of a universal freedom to connect. They argue that efforts to create a universal internet built upon Western legal, political, and social preferences is driven by economic and geopolitical motivations rather than the humanitarian and democratic ideals that typically accompany related policy discourse. In fact, the freedom-to-connect movement is intertwined with broader efforts to structure global society in ways that favor American and Western cultures, economies, and governments. Thought-provoking and far-seeing, *The Real Cyber War* reveals how internet policies and governance have emerged as critical sites of geopolitical contestation, with results certain to shape statecraft, diplomacy, and conflict in the twenty-first century.

Written with an example-based approach, *Building UIs with Wijmo* leads you step by step through the implementation and customization of each library component and its associated resources. Reference tables of each configuration option, method, and event for each component are provided, alongside detailed explanations of how each widget is used. *Building UIs with Wijmo* is targeted at readers who are familiar with HTML, CSS, JavaScript, and jQuery, and have a basic understanding

of web development. Although knowledge of jQuery UI is not mandatory, it would be a bonus as it is quite similar to Wijmo. Only the last chapter of the book on extending Wijmo requires advanced CSS and JavaScript knowledge.

In *Cosmopolitan Anxieties*, Ruth Mandel explores Germany's relation to the more than two million Turkish immigrants and their descendants living within its borders. Based on her two decades of ethnographic research in Berlin, she argues that Germany's reactions to the postwar Turkish diaspora have been charged, inconsistent, and resonant of past problematic encounters with a Jewish "other." Mandel examines the tensions in Germany between race-based ideologies of blood and belonging on the one hand and ambitions of multicultural tolerance and cosmopolitanism on the other. She does so by juxtaposing the experiences of Turkish immigrants, Jews, and "ethnic Germans" in relation to issues including Islam, Germany's Nazi past, and its radically altered position as a unified country in the post-Cold War era. Mandel explains that within Germany the popular understanding of what it means to be German is often conflated with citizenship, so that a German citizen of Turkish background can never be a "real German." This conflation of blood and citizenship was dramatically illustrated when, during the 1990s, nearly two million "ethnic

Germans” from Eastern Europe and the former Soviet Union arrived in Germany with a legal and social status far superior to that of “Turks” who had lived in the country for decades. Mandel analyzes how representations of Turkish difference are appropriated or rejected by Turks living in Germany; how subsequent generations of Turkish immigrants are exploring new configurations of identity and citizenship through literature, film, hip-hop, and fashion; and how migrants returning to Turkey find themselves fundamentally changed by their experiences in Germany. She maintains that until difference is accepted as unproblematic, there will continue to be serious tension regarding resident foreigners, despite recurrent attempts to realize a more inclusive and “demotic” cosmopolitan vision of Germany.

Toxicogenomics, the study of how genomes respond to exposure to toxicants, may ultimately hold the promise of detecting changes in the expression of a person's genes if he or she is exposed to these toxicants. As the technology rapidly develops, it is critical that scientists and the public communicate about the promises and limitations of this new field. Communicating technical information to the public about a developing science can be challenging, particularly when the applications of that science are not yet well understood. Communicating Toxicogenomics Information to Nonexperts is the summary

of a workshop designed to consider strategies for communicating toxicogenomic information to the public and other non-expert audiences, specifically addressing the communication of some key social, ethical, and legal issues related to toxicogenomics and addressing how information related to the social implications of toxicogenomics might be perceived by nonexperts.

Mathew Kalling knows better than to get involved with a party girl. You can't be charged with running an oil empire and still think a wild woman is a safe bet. But once he's had a taste, he just can't seem to stay away. Try to sweep Jessica Thorne off her feet and she'll head for the hills. Nothing sends her running faster than grand gestures and fairy-tale promises. But when her back is against the wall will she finally take the risk and let love whisk her away?

The world's second-wealthiest country, Japan once seemed poised to overtake America. But its failure to recover from the economic collapse of the early 1990s was unprecedented, and today it confronts an array of disturbing social trends. Japan has the highest suicide rate and lowest birthrate of all industrialized countries, and a rising incidence of untreated cases of depression. Equally as troubling are the more than one million young men who shut themselves

Acces PDF Cmc Rope Rescue Manual 9780961833770 James Frank

in their rooms, withdrawing from society, and the growing numbers of “parasite singles,” the name given to single women who refuse to leave home, marry, or bear children. In *Shutting Out the Sun*, Michael Zielenziger argues that Japan’s rigid, tradition-steeped society, its aversion to change, and its distrust of individuality and the expression of self are stifling economic revival, political reform, and social evolution. Giving a human face to the country’s malaise, Zielenziger explains how these constraints have driven intelligent, creative young men to become modern-day hermits. At the same time, young women, better educated than their mothers and earning high salaries, are rejecting the traditional path to marriage and motherhood, preferring to spend their money on luxury goods and travel. Smart, unconventional, and politically controversial, *Shutting Out the Sun* is a bold explanation of Japan’s stagnation and its implications for the rest of the world.
