The refined costing system requires you to perform the following three tasks: Direct cost tracing: Review your direct costs and categorize more costs as direct costs, if possible. Cost pools: Review cost pools and create more pools, if necessary. Cost-allocation bases: Decide on cost-allocation bases by using cause-and-effect criteria.

How to Design an Activity-Based Costing System - dummies

Cost management systems are simply the methods used to evaluate the results of decisions made as a result of cost management strategies. Costing systems have three primary goals: - provide cost information for strategic decision making, - to provide cost information for operational control, and - to measure inventory value and cost of goods. There are two primary cost management systems:
