"Intermediate Financial Accounting Volume 1 by G. Arnold and S. Kyle, developed in collaboration by Athabasca University and Lyryx, is intended for a first course in Intermediate Financial Accounting, and presumes that students have already completed one or two Introductory Financial Accounting courses. The textbook reflects current International Financial Reporting Standards (IFRS), such as IFRS 15 – Revenue from Contracts With Customers. This textbook provides a review of introductory accounting concepts and covers all topics essential to a first level Intermediate Accounting course: the conceptual framework and current landscape of financial reporting; statements of financial position; comprehensive income; cash flows and shareholders' equity; cash and receivables; revenue; inventory; property, plant and equipment; intangible assets; and intercorporate investments. For those requiring preparation for CPA designation, competencies as outlined by the CPA are addressed in this textbook. For a detailed competency map, please contact us at info@lyryx.com. It also focuses on more difficult intermediate accounting topics that match prerequisite requirements for students advancing to a second level Intermediate Financial Accounting course. Topics that are covered in Advanced Financial Accounting

courses, such as consolidations and foreign exchange, are not included here."--BCcampus website.

International GAAP® 2019 is a comprehensive guide to interpreting and implementing International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and providing insights into how complex practical issues should be resolved in the real world of global financial reporting. This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching IFRS. Written by EYs financial reporting professionals from around the world, this three-volume guide to reporting under IFRS provides a global perspective on the application of IFRS. Complex technical accounting issues are explained clearly and IFRS is set in a practical context with numerous worked examples and hundreds of illustrations from the published financial reports of major listed companies from around the world. The 2019 edition of International GAAP® has been fully revised and updated in order to:

- Continue to investigate the many implementation issues arising as entities adopt IFRS 9 (Financial Instruments) and IFRS 15 (Revenue from Contracts with Customers).
- Explore the complex implementation issues arising as entities adopt, in 2019, IFRS 16 (Leases).
- Include an updated chapter on the new insurance contracts standard IFRS 17 (Insurance Contracts), which reflects the recent discussions of the IASB's Transition Resource Group on implementation issues raised, proposed narrow-scope amendments to IFRS 17 intended by the IASB, and also explores other matters arising as users prepare for the adoption of this standard.
- Include an amended chapter on the revised Conceptual Framework, which was published in March 2018. The changes to the Conceptual Framework may affect the application of IFRS in situations where no standard applies to a particular transaction or event.
- Address amended standards and new interpretations issued since the preparation of the 2018 edition.
- Explain the many other initiatives that are currently being discussed by the IASB and by the IFRS Interpretations Committee and the potential consequential changes to accounting requirements.
- Provide insight on the many issues relating to the practical application of IFRS, based on the extensive experience of the book's authors in dealing with current issues.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

This book contains the solutions to the exercises in the Intermediate Financial Accounting Volume 2 textbook.

English in academic and professional settings has received great attention over the last 50 years, as its use has become a key asset for anyone interested in improving his/her chances of communicating internationally. However, it still offers rich opportunities for teachers and researchers working on English in specific settings. The aim of English for Professional and Academic Purposes is to offer an overview of several topics within the field of discourse analysis applied to English in academic and professional domains. The book compiles contributions from different origins, ranging from Japan to the USA and several European countries, and covers English as a native, second, foreign and international language. It also deals with various specialities, including academic writing, business discourse or English for medicine, nursing, maritime industry and science and engineering. This volume is divided into three sections: Discourse Analysis of English for Academic Purposes, Professional English and EPAP Pedagogy, since it was conceived as a contribution to the research on how English is analysed as both the discourse of and for effective communication in academic and professional settings, and how it can be applied to teaching. This manuscript offers some fresh insights for those involved or interested in this field of expertise, in an attempt to shed some light on its latest innovations.

Survey of Accounting, 3rd edition, is designed to cover both financial and managerial accounting in a single 16-week course, presenting the material in a style easy for non-accounting majors to grasp. It incorporates the same pedagogical innovations that have made Edmonds' financial and managerial titles such fast-growing successes in the marketplace, including his unique Horizontal Financial Statements Model and a multiple accounting cycle approach that demonstrates the impact of related events over a series of accounting cycles.

The book is a manual on how to create material wealth and gain spiritual abundance at the same time. It hopes to raise a new breed of millionaires who are simple, loving and generous.
