This "first instinct fallacy" persists, says Justin Kruger, a psychologist at the University of Illinois at Urbana-Champaign, because instances when we change an answer from right to wrong loom...

The First Instinct Fallacy | Psychology Today

To establish the first-instinct fallacy, the researchers examined the introductory psychology midterm exams of 1,561 University of Illinois students for eraser marks. They counted the number of times students changed answers and found that 51 percent of the changes were from wrong to right, 25 percent were from right to wrong and 23 percent were from wrong to wrong.

'Trust your first instincts': Fallacious folklore?

However, most students and many teachers would choose "go with your gut instinct", otherwise known as the First Instinct Fallacy (Kruger, Wirtz, & Miller, 2005). In this well-known article by Kruger and colleagues, they found (in 4 separate experiments) that when students change their answers, they typically change from incorrect to correct answers, they underestimate the number of changes from incorrect to correct answers, and overestimate the number of changes from incorrect to correct.
