Description

#1 NEW YORK TIMES BESTSELLER □ The game-changing author of Tribe of Mentors teaches you how to reach your peak physical potential with minimum effort. □A practical crash course in how to reinvent yourself.□□Kevin Kelly, Wired Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. The 4-Hour Body is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It□s the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it□s all here, and it all works. You will learn (in less than 30 minutes each): □ How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails □ How to prevent fat gain while bingeing over the weekend or the holidays □ How to sleep 2 hours per day and feel fully rested □ How to produce 15-minute female orgasms □ How to triple testosterone and double sperm count □ How to go from running 5 kilometers to 50 kilometers in 12 weeks □ How to reverse □permanent□ injuries □ How to pay for a beach vacation with one hospital visit And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That□s exactly what The 4-Hour Body delivers.

First Published in 1979. Routledge is an imprint of Taylor & Francis, an informa company.

First published between 1913 and 1994, this 6 volume set examines the history of Islam in a variety of regions across the world. Spanning continents from Africa, to Asia, North America and Europe, and ranging from 19th century ethnographical studies to modern day historical research, these titles not only demonstrate the diversity within this global religion, but also how the study of Islam has changed over time. The titles in this set will be of interest to those studying the history of Islam as well as those fascinated by the study of religion and international communities itself.

Themes included are:¿Issues on Health and Disease Approaches¿Health and Health Care Systems: Socio-cultural and Ecological Dimension¿Nutrition, Human Growth and Development¿Health and Mental Illness¿Contemporary Issues in Tribal Health and Care of the AgedContributors are from ¿Academic and research institutions of various States and Union Territories¿Subject specialists from different fields such as ¿Anthropology¿Biochemistry¿Bio-medicine ¿Community medicine¿Demography ¿Geography¿Home science¿Indigenous System of Medicine¿Ayurveda ¿Microbiology ¿Pediatrics¿Philosophy¿Psychiatry and Social Psychology¿Covers a variety of therapies ranging from traditional to modern therapy for curing illness and disease¿Research Papers have been reviewed by the subject specialists¿Useful for the academicians from the fields of anthropology, sociology, psychology, home science, medical professionals, social scientists, administrators, planners, NGOs, teachers and students of various disciplines, and the broad spectrum of scholars interested in the science of man.

Oehlert's text is suitable for either a service course for non-statistics graduate students or for statistics majors. Unlike most texts for the one-term grad/upper level course on experimental design, Oehlert's new book offers a superb balance of both analysis and design, presenting three practical themes to students: □ when to use various designs □ how to analyze the results □ how to recognize various design options Also, unlike other older texts, the book is fully oriented

toward the use of statistical software in analyzing experiments.

In this eagerly awaited follow-up to the international bestseller *Fantastic Cities*, artist Steve McDonald uses his unique large-format approach working from actual photographs to create beautifully detailed line drawings of amazing buildings and other structures from around the world. The globe-trotting selection includes buildings from six continents—including Prague's Astronomical Clock, Russia's St. Basil's Cathedral, a Florentine bridge, a Romanian castle, an Indian palace, and many dozens more—alongside fun-to-color details from iconic structures such as the Eiffel Tower, the London Bridge, and the Chrysler Building. The crisp white pages are conducive to a range of applications, and a middle margin keeps all the artwork fully colorable. A dozen imaginative architectural mandala illustrations round out this gorgeous adult coloring book.

Analyzes four megatrends—population growth, urbanization, coastal life and connectedness—and concludes that future conflict is increasingly likely to occur in sprawling coastal cities; in underdeveloped regions of the Middle East, Africa, Latin America and Asia; and in highly networked, connected settings, in a book that also looks at gangs, cartels and warlords.
