How Often Should You Change Engine Oil - 6 steps

So the answer to the question "how often should you change engine oil in used cars" is the same as in the case of new cars: not less often than every 15,000 km or every year. So why can you encounter different suggestions?

How often should you change engine oil? - autoDNA Blog

As a general rule, you should change your engine oil every 3,000-5,000 miles or approximately every six months. Depending on your car's age, oil type and driving conditions, you may be able to...

How do I change my car's oil, how often should I do it and ...

Use common sense and whatever the manufacturer recommends, cut that recommendation in half. Clean, new engine oil and a quality filter at least every 5,000 miles is cheap insurance for your vehicle to live a long life. Changing the engine oil and filter is the number ONE thing to do in car maintenance.

How Often Should You Really Change That Engine Oil ...

The traditional recommendation is that you should change your oil every 3,000 miles or 6 months, whichever comes first. However, the new standard is that you can typically change your oil every 5,000 miles worry-free (especially if you are driving a relatively new car or are in "optimal operating conditions).

How Often Should You Change Your Oil? - dummies

Let us simplify it for you. Conservative estimates for oil-change intervals used to be as low as 3000 miles, before significant improvements in fuel-delivery systems, engine materials,...

When Should You Change Your Oil?

Most cars can go at least 5,000 miles before an oil change. "Change your car's engine oil every three months, or 3,000 miles." At one time, that was standard auto advice. That same advice now feels as outdated as car cassette players and road atlases in your glove compartment.

In general, oil change services should be done every 5,000 to 7,000 miles; however, each vehicle is different, and how often you need to change your oil depends on a few factors. Firstly, the age and general maintenance condition of your BMW come into play.

---

How often does a BMW need an oil change?

In the past, manufacturers recommended changing the oil every 3,000 miles, however with the advancement of synthetic engine oils it is unlikely that your car will need an oil change quite this often. Every manufacturer is different but you should follow the advice regarding oil change intervals in your owner's manual.
