Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

From the preminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters -- generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty -- come to life in all their human uniqueness, free from idealization.

This book provides a timely evaluation of the EU's ability to act internationally and coordinate policy in a time when it also seeks to meet shifting demands of international cooperation. These include global sustainable development, the challenge of multilateralism and the changing geopolitical order. Analysing the networks of officials and policy professionals in EU development policy, the book yields theoretical insights into dominant processes that characterise EU governance in international cooperation and assesses their role for policy coordination. Overall, this book concludes that EU policy coordination evades intergovernmental control and demonstrates how the agency of EU institutions depends on efforts of member state officials to defend their priorities and identities. Finally, it shows the need to better understand the EU as a collective international actor, beyond the widespread concern with institutional adjustments, which continuously fail to produce the intended outcomes. This text will be of key interest to scholars and students of European and EU politics, EU foreign policy, EU external relations and more broadly to international relations and international development.
