The Robeson County Humane Society has scheduled a Christmas in July supply drive for 11 a.m. to 3 p.m. July 17 at the Fresh Foods store located at 1733 Roberts Ave. in Lumberton. The Society will ...

The ultimate "dictionary" for lovers of Provence: Peter Mayle's personal selection of the foods, customs and words he finds most fascinating, curious, delicious, or just plain fun. Though organized from A to Z, this is hardly a conventional work of reference. In more than 170 entries, Peter Mayle--bestselling author of A Year in Provence--writes about subjects as wide-ranging as architecture and zingue-zingue-zoun (in the local patois, a word meant to describe the sound of a violin). And, of course, he writes about food and drink: vin ros\u00e9, truffles, olives, melons, bouillabaisse, the cheese that killed a Roman emperor, even a cure for indigestion. Provence A-Z is a delight for Peter Mayle's ever-growing audience and the perfect complement to any guidebook on Provence, or, for that matter, France.

Serves as an index to Eric reports [microform].

Partial Differential Equations presents a balanced and comprehensive introduction to the concepts and techniques required to solve problems containing unknown functions of multiple variables. While focusing on the three most classical partial differential equations (PDEs)--the wave, heat, and Laplace equations--this detailed text also presents a broad practical perspective that merges mathematical concepts with real-world application in diverse areas including molecular structure, photon and electron interactions, radiation of electromagnetic waves, vibrations of a solid, and many more. Rigorous pedagogical tools aid in student comprehension; advanced topics are introduced frequently, with minimal technical jargon, and a wealth of exercises reinforce vital skills and invite additional self-study. Topics are presented in a logical progression, with major concepts such as wave propagation, heat and diffusion, electrostatics, and quantum mechanics placed in contexts familiar to students of various fields in science and engineering. By understanding the properties and applications of PDEs, students will be equipped to better analyze and interpret central processes of the natural world.

First multi-year cumulation covers six years: 1965-70.

The Handbook provides internal guidance and establishes national policy for conducting consultation and conferences pursuant to section 7 of the Endangered Species Act of 1973, as amended. The purpose of the Handbook is to promote efficiency and nationwide consistency within and between the Services. The Handbook addresses the major consultation processes, including informal, formal, emergency, and special consultations, and conferences.
