William Shakespeare was born April 1564 and died 23 April 1616, four hundred years ago. Today the bard from Queen Elizabeth's I's Merrie England is the most-read author in the world. His works are truly international, with copies of plays and poetry by William Shakespeare exceeding four billion. He is among the most translated authors in history, eclipsed only by the Bible. Shakespeare penned some of the most celebrated dramas, but also added to the language, inventing an amazing 1,700 new words. His father was a glove maker, leather worker and wool merchant; his mother, Mary Arden, was from a landowning family. One of eight children, young Shakespeare was probably educated at the local King Edward VI Grammar School in Stratford but would eventually make his name as an actor and playwright in London. Now, some four centuries onward, Shakespeare's writings continue to enthrall and enrapture audiences, to inspire and thrill, not just at Stratford or in London's Globe Theatre but in every corner of the worldwide globe. This highly illustrated book is crammed with images and facts that encapsulate the glory of this amazing man, his life, his works (that include plays, poetry and sonnets), his language and legacy.

This volume gathers recent research findings in the field of foreign language (FL) teaching in Romanian higher education dwelling on both methodology and students' learning outcomes. The book satisfies the need for an up-to-date overview of FL teaching in Romanian universities in the European context as well as from a global international perspective. This book confers visibility to Romanian foreign language scholars' research and it opens new paths for debate and collaboration worldwide. The scholars included in this volume have extensive expertise in the field of foreign language teaching and research in higher education which is supported by their international recognition as specialists in their specific areas. The contributing authors approach their respective chapters relying on both qualitative and quantitative research. Their experience and conclusions will prove helpful for any foreign language professional working in tertiary education.

A collection of letters in a small painted box passed down through three generations of a London family is the starting point for a vivid account of a three-month journey up and down the Nile in a bygone age. The letters, like a time capsule, bring to life a lost world of Edwardian travel and social mores, of Egypt on the brink of the modern age, of the great figures of Egyptology, of aristocrats and archaeologists. In 1907/08 Ferdinand Platt (known to his family as Ferdie) traveled to Egypt as personal physician to the ailing 8th Duke of Devonshire—one of the giant statesmen of the late Victorian age—and his family party, recounting his adventure in letters to his young wife in England. Throughout the journey Ferdie not only reported on the sights of the country around him, with his amateur Egyptologist's eye, and the people he met along the way (including Howard Carter and Winston Churchill) but also recorded his private thoughts and intimate observations of a formal and stratified society, soon to be witness to its own extinction. Introduced by Egyptologist Toby Wilkinson and Ferdie's great-nephew Julian Platt, the letters open an intriguing window onto travel in Egypt during the Belle Epoque and the golden age of Egyptology.

Fourteen-year-old Will doesn't think he has much in common with his family. Nothing, that is, except a strange passion for digging which he shares with his father. But one day, Will's dad mysteriously vanishes down a tunnel - part of London's vast, labyrinthine underground system. With his friend Chester, Will decides to investigate. But soon the boys find themselves deep in darkness, unearthing a terrifying secret which may cost them their lives... This riveting bestseller oozes the mysterious fascination of the underground and all its hideous possibilities. Creepy, tantalising and original, it's full of thrills to keep you burrowing in!

This report repositions a group of 17 neglected tropical diseases on the global development agenda at a time of profound transitions in the economies of endemic countries and in thinking about the overarching objectives of development. In doing so it reinvigorates the drive to prevent control eliminate or eradicate diseases that blind maim and disfigure making life miserable for more than a billion people. Undetected and untreated several almost invariably kill. The burden of these diseases is further amplified by the fact that many require chronic and costly care underscoring the economic as well as the health benefits of preventive chemotherapy and early detection and care. The report brings a new dimension to long-term thinking about the future approach to these diseases. For the first time it sets out financing needs options and targets for meeting WHO Roadmap goals by 2020 but also for reaching universal coverage of all people in need by 2030. The report makes one investment case for cost-effectiveness and a second investment case where equity is the focus. It sets targets for ending catastrophic health expenditures and as part of the drive to strengthen health systems for getting services closer to where people live.

A powerful case for the global market economy The debate on globalization has reached a level of intensity that inhibits comprehension and obscures the issues. In this book a highly distinguished international economist scrupulously explains how globalization works as a concept and how it operates in reality. Martin Wolf confronts the charges against globalization, delivers a devastating critique of each, and offers a realistic scenario for economic internationalism in the future. Wolf begins by outlining the history of the global economy in the twentieth century and explaining the mechanics of world trade. He dissects the agenda of globalization's critics, and rebuts the arguments that it undermines sovereignty, weakens democracy, intensifies inequality, privileges the multinational corporation, and devastates the environment. The author persuasively defends the principles of international economic integration, arguing that the biggest obstacle to global economic progress has been the failure not of the market but of politics and government, in rich countries as well as poor. He examines the threat that terrorism poses and maps the way to a global market economy that can work for everyone.

A chance encounter with Harry Houdini leaves a small boy in possession of a mysterious box—one that might hold the secrets to the greatest magic tricks ever performed.

The revision comes 10 years after the first edition and completely overhauls the text not only in terms of look and feel but also content which is now contemporary while also being timeless. A large number of words are explained with the help of examples and their lineage which helps the reader understand their individual usage and the ways to use them on the correct occasion.

The Knowledge Of The Hidden That Is The Meaning Of The Latin Occultus, From Which We Take Our Modern Phrase The Occult . Why Is It That This Subject Stirs Up So Much Controversy?
