When you open a database, the ribbon appears at the top of the main Access window, where it displays the commands in the active command tab. The ribbon contains a series of command tabs that contain commands. In Access, the main command tabs are File, Home, Create, External Data, and Database Tools. Each tab contains groups of related commands, and these groups surface some of the additional new UI elements, such as the gallery, which is a new type of control that presents choices visually.

Like relational databases,
Microsoft Access also allows you
to link related information easily.
For example, customer and order
data. However, Access 2013 also
complements other database
products because it has several
powerful connectivity features. It
can also import or link directly to
data stored in other applications
and databases.
