~~DELKRON ENGINE - CAS4~~

A connecting rod, also called a con rod, is the part of a piston engine which connects the piston to the crankshaft.Together with the crank, the connecting rod converts the reciprocating motion of the piston into the rotation of the crankshaft. The connecting rod is required to transmit the compressive and tensile forces from the piston, and rotate at both ends.

~~Connecting rod - Wikipedia~~

A flathead engine, otherwise sidevalve engine, is an internal combustion engine with its poppet valves contained within the engine block, instead of in the cylinder head, as in an overhead valve engine.. Flatheads were widely used internationally by automobile manufactueres from the late 1890's until the mid-1950's but were replaced by more efficient overhead valve and overhead camshaft ...
