Regionals: Sight Singing Practice - YouTube

This is a fantastic guide for sight singing. It starts with simple melodies to sing explaining how to read the music to get the timing and notes right and then gets gradually more difficult to more complex pieces of music. This book is essential for any vocal student or vocal tutor to help their students.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- The most engaging and musical Sight-Singing text on the market. Music for Sight Singing is structured around organized melodiesdrawn from the literature of composed music and a wide range of the world's folk music. Real music exercises allow readers to practice sight singing and develop their "mind's ear" -- the ability to imagine how music sounds without first playing it on an instrument. The ninth edition continues to introduce a host of important musical considerations beyond pitch and rhythm- including dynamics, accents, articulations, slurs, repeat signs, and tempo markings. The book's arrangement of simple to complex exercises lays the foundations for success. Learning Goals Upon completing this book, readers will be able to: Fluently read rhythms in simple and compound meters, including those in relatively unusual, irregular, or changing meter signatures. Sight sing melodies in any major or minor key, and in any diatonic mode. Effortlessly read all four common clefs. Understand common musical symbols and terms. Recognize and sing important harmonic features such as dominant seventh and Neapolitan chords. Improvise effectively from a variety of background structures such as a harmonic progression or an underlying contrapuntal framework. Negotiate chromatic passages from simple embellishing tones and tonicizations to modulations to post-tonal music. NOTE: MySearchLab does not come automatically packaged with this text. To purchase the text with MySearchLab, order the package ISBN: 020595524X / 9780205955244 Music for Sight Singing Plus MySearchLab with eText -- Access Card Package Package consists of: 0205938337 / 9780205938339 Music for Sight Singing 0205955053 / 9780205955053 MySearchLab with Pearson eText -- Valuepack Access Card -- for Music for Sight Singing

Students of music are faced with the challenge of developing their aural skills to the point at which they can see music on the page with thoughtful, trained eyes and hear it with their mind's ear. Sight Singing Complete, leads students to this point by beginning with the familiar and moving gently toward the unfamiliar until they are transforming symbol into sound and improvising in all idioms. The 8th edition of Sight Singing Complete preserves the multi-faced pedagogical approach and the commitment to historical repertoire from the seventh edition. New to this edition is an integrated approach to rhythm and performance ◻ This edition is unusual in that we not only expect student to master each skill by itself, we also expect them to integrate all three skills in carefully designed sequence of [Play + Sing] exercises adapted from 18th ◻ 21st century instrumental and vocal repertoire.

Musical material specifically composed for the study of sight singing.

Designed for the musicianship portion of the freshman theory sequence, Benjamin/Horvit/Nelson MUSIC FOR SIGHT SINGING, Sixth Edition, presents music that is challenging without overwhelming young musicians. Drawing on their extensive experience as composers and arrangers who adapt music for their own students, the authors strike a critical balance between rigor and accessibility. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Titles in the Dictionaries for the Modern Musician series offer both the novice and the advanced artist key information designed to convey the field of study and performance for a major instrument or instrument class, as well as the workings of musicians in areas from conducting to composing. Each dictionary covers topics from instrument parts to technique, major works to key figures/a must-have for any musician's personal library! A Dictionary for the Modern Singer is an indispensable guide for students of singing, voice pedagogues, and lovers of the art of singing. In addition to classical singing, genres, and styles, musical theatre and popular and global styles are addressed. With an emphasis on contemporary practice, this work includes terms and figures that influenced modern singing styles. Topics include voice pedagogy, voice science, vocal health, styles, genres, performers, diction, and other relevant topics. The dictionary will help students to more fully understand the concepts articulated by their teachers. Matthew Hoch's book fills a gap in the singer's library as the only one-volume general reference geared toward today's student of singing. An extensive bibliography is invaluable for students seeking to explore a particular subject in greater depth. Illustrations and charts further illuminate particular concepts, while appendices address stage fright, tips on practicing, repertoire selection, audio technology, and contemporary commercial music styles. A Dictionary for the Modern Singer will appeal to students of singing at all levels. For professionals, it will serve as a quick and handy reference guide, useful in the high school or college library and the home teaching studio alike; students and amateurs will find it accessible and full of fascinating information about the world of the singing.

This book has become a classic in all musicians' libraries for rhythmic analysis and study. Designed to teach syncopeation within 4/4 time, the exercises also develop speed and accuracy in sight-reading with uncommon rhythmic figures. A must for all musicians, especially percussionists interested in syncopeation.

In Voice Secrets: 100 Performance Strategies for the Advanced Singer, Matthew Hoch and Linda Lister create order out of the chaotic world of singing. They examine all aspects of singing, including nontechnical matters, such as auditioning, performance anxiety, score preparation, practice performance tips, business etiquette, and many other important topics for the advanced singer. Voice Secrets provides singers with a quick and efficient path to significant improvement, both technically and musically. It is the perfect resource for advanced students of singing, professional performers, music educators, and avid amateur musicians. The Music Secrets for the Advanced Musician series is designed for instrumentalists, singers, conductors, composers, and other instructors and professionals seeking a quick set of pointers to improve their work as performers and producers of music. Easy to use and intended for the advanced musician, contributions to Music Secrets fill a niche for those who have moved beyond what beginners and intermediate practitioners need.

Learning Music Theory with Logic, Max, and Finale is a groundbreaking resource that bridges the gap between music theory teaching and the world of music software programs. Focusing on three key programs—the Digital Audio Workstation (DAW) Logic, the Audio Programming Language (APL) Max, and the music-printing program Finale>this book shows how they can be used together to learn music theory. It provides an introduction to core music theory concepts and shows how to develop programming skills alongside music theory skills. Software tools form an essential part of the modern musical environment; laptop musicians today can harness incredibly powerful tools to create, record, and manipulate sounds. Yet these programs on their own don't provide musicians with an understanding of music notation and structures, while traditional music theory teaching doesn't fully engage with technological capabilities. With clear and practical applications, this book demonstrates how to use DAWs, APLs, and music-printing programs to create interactive resources for learning the mechanics behind how music works. Offering an innovative approach to the learning and teaching of music theory in the context of diverse musical genres, this volume provides game-changing ideas for educators, practicing musicians, and students of music. The author's website at <http://www.geoffreykidde.com> includes downloadable apps that support this book.
