The new OWL CM119 Wireless Energy Monitor is now available for sale in the UK. The CM119, is an upgraded version of the original OWL Wireless Energy Monitor (itself a rebranding of Electrisave – reviewed here). The old version of OWL/Electrisave though very reliable and well made lacked the deeper functionality provided by Efergy and the Eco-Eye wireless energy monitors – primarily their excellent memory functions which enable energy usage data to be stored and viewed later on for analysis.
