Petroleum engineers design and develop methods for extracting oil and gas from deposits below the Earth's surface. Petroleum engineers typically do the following: Design equipment to extract oil and gas from onshore and offshore reserves deep underground

Petroleum Engineer Career Profile | Job Description ..

Petroleum engineers help locate natural reservoirs of petroleum deposits. They work with teams of specialists to develop more effective, cost-efficient methods of petroleum recovery through the...

Petroleum Engineer: Job Description & Career Info

Petroleum engineers have a future full of challenges and opportunities. They must develop and apply new technology to recover hydrocarbons from oil shale and offshore oil and gas fields. They must also devise new techniques to recover oil left in the ground after application of conventional producing techniques.
