ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use

surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with

Governments across the globe have fallen; warlords and suicide cults have risen from the ashes. All because five years ago, you had a score to settle. But you've discovered something in the meantime: you destroyed the world on false pretenses. For
