A try gun is a useful tool and is used to assess the rifle gun fit for you. Professional gun fitting with a try gun You take a try-gun out on the shooting range to test on targets and have it fully adjusted for stock dimensions, trigger pull and lengths. Then a professional fitter will measure the try-gun against you for a first fit.

~~GUN FIT AND A BRILLIANT WAY TO CHECK IT ...~~ Roger Pace YouTube

The gun is mounted into the shoulder, so any ill-fitting components can be noted, and the gun fitter looks directly down the barrels to check the cast. Once the adjustments appear to suit the individual, the gun can then be tried out on the pattern plate. Subject to those findings, you can then move to a stand.

Guide to Measurements A gun fits when the muzzle is seen on top of the action after the gun has been raised to the centre of the shoulder and fits snugly in the cheek. Stance, posture and being relaxed are essential, when the stock is being raised to take accurate stock measurements.

~~Gun Fitting — Getting The Right Fit~~

With a proper comb height fit, you should be looking straight down the flat rib on top of the barrel when you mount the gun. When you shoulder your gun, the rib should be virtually unseen. That means your eye is neither above nor below the line of the rib. If your gun has a center bead, it and the front bead should be perfectly aligned.

~~How To Fit Your Shotgun For More Accurate Shooting~~

Length of pull is defined as the distance from the trigger to the rifle butt. Most of us buy a gun and use it as-is. Most rifles tend to come from the factory with a length of pull in the 13.25" to 13.75" range. My Sako has a 14.25" LOP.

~~Rifle Fit: Length of Pull ¶ Art of the Rifle~~

Gun fitting is an art beyond taking simple measurements and your best fit will be achieved with the help of a skilled professional gun fitter. This is where Keith's 20+ years of gun fitting experience is valuable, by specifying the required alterations in detail. It is often said the person pulling the trigger (and not the gun) gets the results.

Most gun fit problems can be solved with a good gun mount. Your gun fit is controlled 100% by your ability to mount the gun consistently. We do about 150 gun fits per year. We use a try-gun when working with extreme lengths of pull (very short or very long) or when a customer want dimensions for a custom made stock. The majority of our gun fits ...

~~Gun Fit — OSP School — Optimum Shooting Performance~~

A comprehensive custom fitting process will usually go through a 4 step system that includes static fitting, dynamic fitting, ball flight analysis and ongoing analysis. The first step, static fitting, requires the golfer to record his or her physical characteristics, including height, wrist-to-floor measurement, hand length and finger length.
