My name is Arturo Basilides. I am an orphan living in the slums of Medio City – the capital of a nation ravaged by a war which was won by extremists. Offered a choice between slavery and disenfranchisement, we exist in an underclass so disconnected we effectively inhabit a different era. Daily life involves scavenging, theft and substance abuse with a bunch of misfits who are somehow still in one piece after years of abandonment. I am a natural born fighter and although I despise warfare, I must witness the downfall of those bastard elites whilst fulfilling my romantic intentions with the forever unattainable girl of my dreams. Sky City is a sci-fi action adventure with light elements of fantasy. It is set in a world where science is indistinguishable from magic and oppression is near-inescapable. Technology has created a newer, 'superior' form of human and genetically engineered monstrosities are as terrifying as anything encountered in your nightmares. The underclass have been underestimated and as they fight back the boundary between freedom fighter and terrorist becomes increasingly blurred. Meanwhile, the drug-induced haze of a traumatised mind places a question mark over the meaning of reality. 'Sky City: The Rise of an Orphan interweaves heavy social issues and philosophy without ever sounding pedantic, milking the sci-fi genre for all its worth. The slum dog's efforts to maintain their humanity in such a heartless age, when everything is going against them is so palpable. The 99% versus 1% theme focuses our minds on where society might be heading and forces us to look at things how they are, if we wish them to be truly different.' Dean C. Moore – Author of Renaissance 2.0

The definitive biography of the iconic skyscrapers and the ambitions that shaped them--from their dizzying rise to their unforgettable fall More than a year after the nation began mourning the lives lost in the attacks on the World Trade Center, it became clear that something else was being mourned: the towers themselves. They were the biggest and brashiest icons that New York, and possibly America, has ever produced--magnificent giants that became intimately familiar around the globe. Their builders were possessed of a singular determination to create wonders of capitalism as well as engineering, refusing to admit defeat before natural forces, economics, or politics. No one knows the history of the towers better than New York Times reporters James Glanz and Eric Lipton. In a vivid, brilliantly researched narrative, the authors re-create David Rockefeller's ambition to rebuild lower Manhattan, the spirited opposition of local storeowners and powerful politicians, the bold structural innovations that later determined who lived and died, master builder Guy Tozzoli's last desperate view of the towers on September 11, and the charged and chaotic recovery that could have unraveled the secrets of the buildings'

collapse but instead has left some enduring mysteries. City in the Sky is a riveting story of New York City itself, of architectural daring, human frailty, and a lost American icon.

SHE KILLED MY FATHER. I'M BRINGING THE WAR TO HER. ? My name is Synn El'Asim and I live on an airship. Our way of life is dictated by seasons—predominately the four-year-long winter that completely freezes the oceans. We are nomads by necessity. Some of us live in the skies, like me. Some on land. Few on the seas. Others reside in the tentacles of large jellyfish we call lethara. ? The Hands of Tarot threaten our ways of life. They're ruled by a queen, Nix, who is trying to destroy the larger tribes. I thought my family and I were safe. We have the largest fleet. We're fast and we're strong. ? I was wrong. She catches up to us with her metal flying machines and horrifically kills my father. The time for running is over. I'm taking the fight to her and her gear-filled city in the clouds.

In Denmark, the science fiction short story is a thriving genre, though mostly as a subculture. Since 2007, The Danish science fiction association, Science Fiction Cirklen, has published an annual anthology of original science fiction short stories written by Danish authors. The present volume contains a selection from the first two of these annual anthologies. Many Danish authors place their stories in a local setting, and all of them have something to say in addition to "just" being entertaining. You will find philosophical parables, time travels, space yarns, alternate history and much more, as well as stories which in different ways come close to the literary mainstream. The huge Anglo-American influence on Danish culture since the Second World War is noticeable in the way the authors use the tropes and language of the genre in its modern, international vein. In making these stories available in English, our aim - besides entertaining the readers - is to demonstrate that science fiction truly is an international genre and that it is being written, even in small European countries like Denmark. With these words we hope you will enjoy this collection of the "best of the best." Contents for Sky City New Science

Trapped between two peoples Erik Tarverro is a half-breed raised as a smith in the human city of Vidran. Hounded for his mixed blood and denied mastery in his craft, he leaps at the chance to join his father's people in the Sky City of Newport. There, he learns he is the only heir of an ancient and noble line. His father's name opens doors and gathers allies, but Erik must still struggle to understand both this strange new culture and his place within it. Fate will deny him a peaceful understanding, though, as the clouds of war gather – and his father's enemies have laid their eyes upon his City in the Sky.

His sister-in-law had a clandestine love affair and forced his cousin to death. The truth was ...

"Amie Kaufman and Meagan Spooner prove they are two living goddesses of writing, creating two compelling worlds with high stakes and gripping emotions." —Sarah Rees Brennan, New York Times bestselling author of the Demon's Lexicon trilogy and the Lynburn Legacy series New York Times bestselling author duo Amie Kaufman and Meagan Spooner have crafted a gripping tale of magic and logic, fate and choice, and a deadly love. Perfect for fans of Laini Taylor and Brandon Sanderson. Prince North's home is in the sky, in a gleaming city held aloft by intricate engines, powered by technology. Nimh is the living goddess of her people on the Surface, responsible for providing answers, direction—hope. North's and Nimh's lives are entwined—though their hearts can never be. Linked by a terrifying prophecy and caught between duty and fate, they must choose between saving their people or succumbing to the bond that is forbidden between them. Plus don't miss the thrilling sequel, Beyond the End of the World!
