From 2001 to 2011, the International Accounting Standards Board (IASB) and its International Financial Reporting Standards (IFRSs), acquired a central position in the practice and regulation of financial reporting around the world. As a unique instance of a private-sector body setting standards with legal force in many jurisdictions, the IASB's rise to prominence has been accompanied by vivid political debates about its governance and accountability. Similarly, the IASB's often innovative attempts to change the face of financial reporting have made it the centre of numerous controversies. This book traces the history of the IASB from its foundation as successor to the International Accounting Standards Committee (IASC), and discusses its operation, changing membership and leadership, the development of its standards, and their reception in jurisdictions around the world. The book gives particular attention to the IASB's relationships with the European Union, the United States, and Japan, as well as to the impact of the financial crisis on the IASB's work. By its in-depth coverage of the history of the IASB, the book provides essential background information that will enrich the perspective of everyone who has to deal with IFRSs or the IASB at a technical or policy-making level.

Die Autorin untersucht, welche Kenntnisse chinesische Manager über westliche Management-Accounting-Instrumente haben, welche Instrumente sie anwenden und wie zufrieden sie damit sind. Die Studie veranschaulicht auch die Anwendungsschwierigkeiten mit den Instrumenten in chinesischen Unternehmen und gibt Einblick in den geschätzten Erfolg durch die Anwendung der Instrumente. Zum ersten Mal wurde die nationale chinesische Kultur als Einflussfaktor in Betracht gezogen und ihre Auswirkung auf die Anwendung der Management-Accounting-Instrumente verdeutlicht. Das Buch bietet mit dem eher wenig erschlossenen Forschungsgegenstand chinesischer Unternehmen eine rare und bereichernde Fundgrube.
