(Maths) Surface Area And Volume Formulas

What are the
formulas for
surface area and
volume of cuboid?

Surface area of
cuboid =

$$2(b+bh+hl)$$

$$\text{Volume} = l \times b \times h$$

Get Free Surface Area

where l = length,
 b = breadth and h =
height. What is the
total surface area
of cylinder?

Surface Areas and Volume - Definition and Formulas

This shape has a
circular base and
straight, parallel
sides. This means
that in order to find

Get Free Surface Area

its surface area or volume, you only need the radius (r) and height (h).

However, you must also factor in that there is both a top and a bottom, which is why the radius must be multiplied by two for the surface area. Surface Area = $2\pi r^2 + 2\pi rh$;

Get Free Surface Area

$$\text{Volume} = \pi r^2 h$$

Formulas For Calculating Surface Area and Volume

Formulas for Geometric ...

Following are the formulas of volume and surface area of a cube - If the length of one side of a cube = a ,
Then, surface area = $6a^2$. Volume = x

Get Free Surface Area

3. Now, let's move to the surface area and volume formula of a cuboid-

If the height of a cuboid = h . Length = l . Width = w .

Then, surface area = $2 (hl + lw + wh)$

Volume = hlw

Surface Areas and Volumes - A Complete Guide

Get Free Surface Area with Formulas

Total Surface Area
 $= \pi(r_1^2 + r_2^2)l + \pi r_1^2 + \pi r_2^2$

Volume = $\frac{1}{3} \pi h (r_1^2 + r_2^2 + r_1 r_2)$
