Now, in *The Birth of the Modern*, Johnson has brought his considerable talents to bear on the formative years of 1815-1830. Johnson describes how, as the Napoleonic Wars came to an end, many of the ideas conceived in the 1770s and 1780s finally were given birth during 1815-1830, laying the foundations of modernity.

For over a century, Karl Marx's critique of capitalism has been a crucial resource for social movements. Now, recent economic crises have made it imperative for us to comprehend and actualize Marx's ideas. But without a knowledge of Karl Marx's life as he lived it, neither Marx nor his works can be fully understood. There are more than twenty-five comprehensive biographies of Marx, but none of them consider his life and work in equal, corresponding measure. This biography, planned for three volumes, aims to include what most biographies have reduced to mere

Background: the contemporary conflicts, struggles, and disputes that engaged Marx at the time of his writings, alongside his complex relationships with a varied assortment of friends and opponents. This first volume will deal extensively with Marx's youth in Trier and his studies in Bonn and Berlin. It will also examine the function of poetry in his intellectual development and his first occupation with Hegelian philosophy and with the so-called "young Hegelians" in his 1841 Dissertation. Already during this period, there were crises as well as breaks in Marx's intellectual development that

It is destined to become a classic.
