"Tree of Ages" by Sara C Roethlis flaunts highly readable sentences and a well crafted plot that held my attention the entire way through - it's definitely a page turner. Yet, with too little character and world development and an over reliance on tropes, this story lacks originality and feels more like a bare outline than a fully-fledged novel.

A tree's memory is long. Magic's memory is longer, and far more dangerous. After a century spent as a tree, Finn awakens into a world she no longer recognizes. In fact, she barely even recognizes herself. Now she seeks answers. Who is she, and why did she return to the world of man? More importantly, why is there a bounty on her head? As Finn takes to the road, others are drawn into her life, as if by fate. Historians, scholars, thieves in disguise, and Iseult, a mercenary of few words whose silent stare seems to lay Finn's soul bare. Dangers faced unleash a wild magic Finn never knew she possessed. Dark forces haunt her steps, stalking Finn for the knowledge locked away in her mind. Before the end, she will discover which proves the ultimate danger: The bounty on her head, or the perilous, forgotten truth buried within her memory.

"The seasons are changing. The lines are faltering, undoing the old and bringing life to the new. Trees will fall, and changed earth will be left in their place. A storm is coming." Finn doesn't remember much about her previous life, and in a world that has been changed by the wars of the Tuatha De, where trust is hard to come by, answers are even more difficult to find. Little does she know, an unknown evil tugs on the strings of fate, and the answers she so desperately seeks may be more important than she could have ever imagined

A deeply moving story about community and resilience, from the point-of-view of the Callery pear tree that survived the attacks on September 11, from Eisner Award-nominated author-illustrator Sean Rubin. * "A resonant, beautifully rendered testament to life and renewal." –Kirkus, starred review In the 1970s, nestled between the newly completed Twin Towers in New York City, a Callery pear tree was planted. Over the years, the tree provided shade for people looking for a place to rest and a home for birds, along with the first blooms of spring. On September 11, 2001, everything changed. The tree's home was destroyed, and it was buried under the rubble. But a month after tragedy struck, a shocking discovery was made at Ground Zero: the tree had survived. Dubbed the "Survivor Tree," it was moved to the Bronx to recover. And in the thoughtful care of the New York City Department of Parks and Recreation, the Callery pear was nursed back to health. Almost a decade later, the Survivor Tree returned home and was planted in the 9/11 Memorial to provide beauty and comfort...and also hope. This is the story of that tree-and of a nation in recovery. Told from the tree's perspective, This Very Tree is a touching tribute to first responders, the resilience of America, and the restorative power of community.

War is coming. With the reappearance of the Tuatha De, the countryside is thrown into chaos. Entire villages have been obliterated. Magic users are suffering persecution along with the Faie, leaving droves of refugees to wait outside the gates of the great cities, hoping for the acceptance that will never come. After a brief reunion with her companions, Finn is stolen away during the night by an unseen foe. Lost and alone, she must put her trust in a stranger if she hopes to reach Migris alive. Yet, nothing is as it seems, and those she trusts most, may very well be the ones to betray her.

Readers of exciting, challenging and visionary literary fiction—including admirers of Norman Rush's Mating, Ann Patchett's State of Wonder, Barbara Kingsolver's The Poisonwood Bible, and Peter Matthiessen's At Play in the Fields of the Lord—will be drawn to this astonishingly gripping and accomplished first novel. A decade in the writing, this is an anthropological adventure story that combines the visceral allure of a thriller with a profound and tragic vision of what happens when cultures collide. It is a book that instantly catapults Hanya Yanagihara into the company of young novelists who really, really matter. In 1950, a young doctor called Norton Perina signs on with the anthropologist Paul Tallent for an expedition to the remote Micronesian island of Ivu'ivu in search of a rumored lost tribe. They succeed, finding not only that tribe but also a group of forest dwellers they dub "The Dreamers," who turn out to be fantastically long-lived but progressively more senile. Perina suspects the source of their longevity is a hard-to-find turtle: unable to resist the possibility of eternal life, he kills one and smuggles some meat back to the States. He scientifically proves his thesis, earning worldwide fame and the Nobel Prize, but he soon discovers that its miraculous property comes at a terrible price. As things quickly spiral out of his control, his own demons take hold, with devastating personal consequences.
