PARIS, Dec.10, 2020 /PRNewswire/ -- RED Technologies announced today the company lodged an application with ISED (Innovation, Science & Economic Development) Canada to become a TV white space (TVWS) database administrator in the country. The decision was made after extensive discussions with the organisation, equipment vendors and internet service providers.

~~RED Technologies to expand TV White Space operations to Canada~~

White Space refers to the unused broadcasting frequencies in the wireless spectrum. Television networks leave gaps between channels for buffering purposes, and this space in the wireless spectrum...

~~White Space, the next internet disruption: 10 things to ...~~

In telecommunications, white spaces refer to frequencies allocated to a broadcasting service but not used locally. National and international bodies assign different frequencies for specific uses, and in most cases license the rights to broadcast over these frequencies. This frequency allocation process creates a bandplan, which for technical reasons assigns white space between used radio bands or channels to avoid interference. In this case, while the frequencies are unused, they have been spec
