You can manually merge changes by selecting Merge, then entering the changes directly into the merge tool specified in your Git settings. Use the checkboxes next to the lines modified to select between remote and local changes entirely, or edit the results directly in the Result editor under the Source and Target editor in the diff view.

Resolve Git merge conflicts - Azure Repos | Microsoft Docs

Install Visual Studio 2019. Microsoft sometimes has weird ways of naming their products (Azure DevOps, we're looking at you). There was a period of time when everything was named with the Visual Studio prefix. That said, don't confuse Visual Studio 2019 with Visual Studio Code. This guide only uses Visual Studio 2019. Let's get started.
