Alexander III of Macedon (356-323 BC) has for over 2000 years been one of the best recognized names from antiquity. He set about creating his own legend in his lifetime, and subsequent writers and political actors developed it. He acquired the surname 'Great' by the Roman period, and the Alexander Romance transmitted his legendary biography to every language of medieval Europe and the Middle East. As well as an adventurer who sought the secret of immortality and discussed the purpose of life with the naked sages of India, he became a model for military achievement as well as a religious prophet bringing Christianity (in the Crusades) and Islam (in the Qur'an and beyond) to the regions he conquered. This innovative and fascinating volume explores these and many other facets of his reception in various cultures around the world, right up to the present and his role in gay activism.

This book is about ways to understand masculinity as systemic and corporeal, structural and performative all at once. It argues that the tension between an understanding of “masculinity” in the singular and “masculinities” in the plural poses a problem that can better be understood in relation to a concomitant tension: between systems on the one hand, and bodies on the other - between abstract structures such as patriarchy, kinship or even language, and the various concrete forms taken by gendered, individuated corporeality. The contributions collected here investigate how masculinities become apparent, how they take shape and what systemic functions they have. What, they ask, are the relations between the abstract and corporeal, metaphorical and metonymic manifestations of masculinity? How are we to understand masculinity as a simultaneously systemic and corporeal, performative concept?
